palatable, provided only that the person who tells the truth is our genuine friend, knows what he is talking about (even though he may not see all sides of the case), and tells us what he has to say, not with a desire to hurt our feelings, but with the transparent purpose to do us good. With this foreword, here is a part of the letter':

A Priest's Letter.

"I would humbly recommend that you lend your entire weight to the cause which the Catholic Total Abstinence Union of America represents, and especially so in its relation to the torking classes of this country, for whom it is doing so much good. You know that the temperance movement is a potent auxiliary to the institutions of our country in building up a better manhood among our citzens. It played a very important part in the two coal strikes of 1900 and 1902, respectively, by keeping the men so ber, and thus removing the danger of riotous and unbecoming conduct-There is one discouraging feature connected with the upward tendency of the wage scale among the workmen of this country. The higher the wages, the more money they spend in saloons. The shorter the hours, the more they are inclined to absent themselves from home. An apparent disregard for family ties is growing among the poorer classes which will eventually lead to a disregard for the blessings our country affords them. Hence, with an increase of wages a corresponding movement for better manhood, noble: citizenship, and truer Chirstianity should be set on foot. The dignity of labor should be maintained, which can be done only through the work, and through the intelligence MURDER IN FIRST DEGREE. and sober mind are necessary for this, Hence, the necessity of the tempermade. Prescription Filling

Is one part of the drug business which I should imagine would be of interest to every customer of a drug store. Not because it is anything wonderful, this being able to compound a doctor's prescription without making an error, but the wonder of obtaining these delicate chemicals, where they come from, the change that takes place in the compounding, and a thousand and one things of importance to health and life in the proper handling of what at first may appear a simple prescription. For instance, the mixof Antipyrine with sweet spirits of nitre, as all pharmacists know, makes a compound which would probably cause death if given in doses as large as might be given of each alone. For a druggist to attempt to mix turpentine. sweet oil and sulphiric acid in a bottle would result in an explosion and the ruining of his clothing of nothing worse happened. Speaking of Antipyrine, it might be of interest to the customer to know that since the patent on Antipyrine has expired it can be bought at a very material reduction from their old price of \$1.40 an ounce. But with Codeine Sulphate at \$3.80 an ounce, Hydrastine from \$1.50 an ounce to \$12.55 an ounce and Homoatropine Hydrobomate at \$168.00 an ounce and these chemicals being prescribed by your physician your breath would be taken away occasionally by the price of a prescription.

However, it has always been my aim to compound prescriptions at a reasonable profit and not make the price of a cheap prescription high enough to pay the extra price of an expensive

I have been in the prescription business pretty much all my life and each year am making an effort to serve my customers better than the year before.
